

Cesar Chabbarria-Garza

Boulder, CO | cech3768@colorado.edu | 720.590.9804

PROFESSIONAL SUMMARY

Second-year Computer Science student at CU Boulder with hands-on experience building enterprise applications, configuring ERP/WMS systems, and exploring network security through personal and academic projects. Brings real consulting experience alongside a strong technical foundation in multiple programming languages.

EDUCATION

University of Colorado Boulder

Bachelor of Arts, Computer Science (Expected Concentration: Computer Science/Network Engineering); Minor in Electrical Engineering. GPA: 3.7.

Boulder, CO
Expected May 2029

EXPERIENCE

Software Consultant

KCCA Software Consultant LLC

Sep 2021 – Present
Parker, CO

- Develop applications within enterprise systems to help businesses streamline warehouse logistics
- Install and configure ERP/WMS software, validate program functionality, and ensure smooth integration across systems
- Built an application to process preexisting invoices; set up and documented a new client server

PROJECTS

Home Lab

Independent Project

Jun 2026 – Present

- Configured unused laptops to build an isolated local network with virtual machines to simulate enterprise network environments
- Simulate and defend against malicious network attacks to develop practical cybersecurity skills

Attack Lab, CU Boulder

Feb 2026 – Mar 2026

- Used GNU Debugger and Linux tools to analyze program compilation and inspect machine code
- Exploited buffer overflow vulnerabilities to understand attack vectors and apply secure programming practices

Dijkstra's Algorithm Project, CU Boulder

Nov 2025 – Dec 2025

- Built a character-based map parser and implemented Dijkstra's algorithm to compute shortest paths between points
- Applied data structures including pointer logic and linked lists to manage graph traversal

SKILLS

Programming Languages: C, C++, Java, JavaScript, PHP, Progress OpenEdge

Tools and Technologies: GNU Debugger, ERP/WMS Systems, Linux, Virtual Machines

Additional: Spanish (Fluent), Remote Experience, Strong Communication, Organizational Agility
